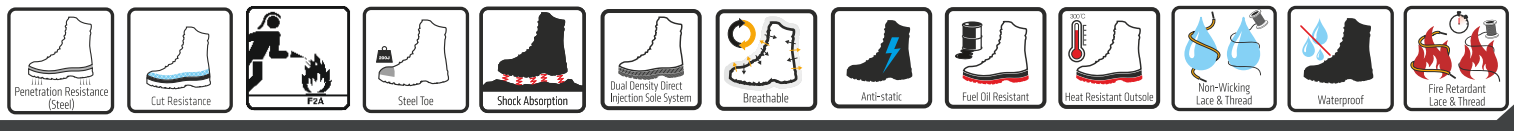
RUBBER / RUBBER ABRASION RESISTANT OUTSOLE

Features

Standard	EN ISO 15090:2012 EN ISO 20345:2011
Category	F2A HI3 CI AN SRC. S3 CR WR HI CI HRO SRC.
Code	FB300GTX
Product type	Fire boot
Colour	Black
Size range	UK sizes 3 - 15 continental 36 - 50
Weight	1.36kg
Upper	Full grain cow hide (2.5 - 2.7mm)
Inner lining	GORE-TEX® performance comfort waterproof and breathable membrane.
Safety features	Steel toe cap resistant up to 200 joules. Stainless steel midsole

Additional features
Side loops for easy donning. Flex areas at rear for ease of bending and kneeling. Reflective panels. Cut resistance strip around the top of the sole unit. Ridged bump cap.

Soling technology
Injected Dual Density Rubber soling system featuring a high compact nitrile rubber outsole and a less dense air injected midlayer for comfort and shock absorption. It is heat resistant throughout to 300°c with a high grip (SRC) outsole. This sole construction has a high bond strength between the upper and sole unit, and high abrasion resistance properties.

Insole technology


Ortholite® Air System open-cell foam technology. Ortholite's® advanced proprietary polyurethane formula with recycled rubber content delivers a combination of benefits unmatched by any other insole manufacturer.
